#### **MINI PROJECTS**

**Title: Review Management System**

**Team Size: 3**

**Technologies used: OOP , Data structures (hash table)**

A System which automates the process of final year project review and makes the process easier and convenient for both staff members and students.

**Title: Port Management System**

**Team Size: 3**

**Technologies used: Java and RDBMS**

This project helps the people who deal with ships. In this project the import , export fee is calculated, the total calculation is made considering all the taxes , no of days the ship resides in the port and it's main work is checking the availability status and helping people to decide further regarding the information available.

**Title: Travel Agencies Web Application**

**Technologies used: HTML5, CSS, PHP, MySQL(XAMPP)**

**Team Size: 2**

In this application the user and the admin will have different login. Customers will be shown the best packages, they can also give their ratings and valuable feedback there. They can view all the details in the web page and enquire if needed.

#### **ONGOING PROJECT**

**Title: Restaurant Inventory Prediction**

**Team Size: 3**

**Technologies used: R tool**

Prediction of what stock to be bought for the next day for any hotel remains a challenge. So we have proposed a solution to predict what and how much of the items necessary is to be bought for the next day is ascertained therefore reducing unwanted buying of excess items Also predicting how much digital India is into effect in restaurants is to be predicted
